

NCFMEC Meeting Notes
May 12-14, 2008
Stillwater, OK Ag Building 410

Attendance: Damona Doye, Arlin Brannstorm, Dale Nordquist, Barry Ward, Dwight Aakre, Doug Jose, George Patrick, Burton Pflueger, Don Breece, Ray Massey, Gary Schnitkey, Mike Duffy, Greg Hanson, Terry Griffin (AR guest), Rodney Jones

Oklahoma visitors: Francis Epplin (faculty) Roger Sahs and Randy True(Extension Associates); JJ Jones, Bill Burton and Daniel Skipper (OK regional specialists); Dan Childs, Job Springer, Jon Biermacher (Noble Foundation).

Don Breece chaired the meeting. Notes taken by Ray Massey.

- 1) Minutes: Motion to approve by Doug, second by Damona. Passed by voice vote.
- 2) State Reports distributed – Arkansas and Pennsylvania also gave state reports.
- 3) Larry Sanders – Farm Bill report and ideas of summer 2008 conference planning.
- 4) David Williams – Advisor Report
 - a) Rethinking the program leader responsibilities
 - b) Looking at fall meeting with program leaders in DC – concerted effort to have more extension component in NRI proposals
 - c) Need more effort in the area of energy –
 - i) want to have a larger extension component in the strategic energy science plan.
 - ii) Need to have contacts in each state who might be involved.
 - iii) Asked us what projects on a multi-state level are occurring that could be reported back to program leaders. He mentioned Annie Projects, Transitioning the Farm, Custom rate and land rental surveys, Budgets, Farm Bill education, individually facing food and fuel questions.
- 5) Janie Hipp – Program Leader report .
 - a) Farm family digest and possibly monthly webinars planned, beginning with farm succession as topic on May 29, 2 p.m. Send ideas for other topics
 - b) Listserv may be expanded to include farm management and marketing
 - c) Visioning, strategic planning processes underway
 - d) Portfolio has expanded to include CRIS and NRI in related areas.
- 6) Educational programs – the following faculty presented on projects they are conducting.
 - a) Mike Woods – OSU Ag Econ departmental update
 - b) Dan Childs – Noble Foundation introduction
 - c) Francis Epplin – Biofuels, especially cellulosic
 - d) Wade Brorsen – Precision Ag and GreenSeeker Technology
 - e) Clem Ward and Damona Doye – Cow/calf and stocker survey
 - f) Gene Parker – Planning for Foot and Mouth Disease Outbreak
 - g) Rodney Holcomb – tour of Food and Ag Products Center
 - h) Bailey Norwood – Animal welfare
 - i) Jayson Lusk – Value of testing for leptin genotype in feedlot cattle
 - j) Kellie Raper – Perceptions of vertical marketing arrangements performance in cow/calf

- k) Dave Freeman – eXtension insights from HorseQuest
 - l) Shannon Ferrell – On farm permitting for biodiesel production
 - m) Brian Briggeman – ARMS access
- 7) Doug Jose – NCRMEC update
 - a) Streamlining application process and changing some terminology for grants.
 - b) For 2008: 61 preproposals, 43 full proposals, funded 22
 - c) Funding approved for Farm Bill proposal (Investigator: Brad Lubben)
 - d) Focus groups will be conducted in each state.
 - e) NCFMEC is the state contact persons for the NCRMEC. We discussed keeping NCFMEC informed since we are the contacts and should interact better.
 - f) Looking for folks to serve on the advisory committee (especially a banker). Let Doug know if you have someone in mind.
 - 8) Dale Nordquist – Uniform Farm Management Program
 - a) Distributed a 2007 accomplishment report
 - b) Discussed getting more states to add data to FinBin and sharing databases across farm management associations.
 - 9) Gary Schnitkey – International Farm Management meetings
 - a) July 19-24, 2009 in Bloomington, IL Title: “Agriculture, Food, Fiber and Energy for the Future”
 - b) Calendar
 - i) July 2008 Call for selected papers – academic and applied routes –
 - ii) November 2008 - 2 page abstract due
 - iii) Jan 2009 notify of acceptance,
 - iv) April 2009 - full paper due
 - 10) Damona Doye – Women in Ag Educators conference follow-up
 - 11) Dwight Aakre – little progress on rental publications but should see progress this summer. Shannon Ferrell indicated that he would help.
 - 12) Don Breece retiring remarks
 - a) Has the box of historical documents of the committee.
 - b) Encouraged the vice president to keep up website.
 - c) Encouraged us to toot our horn because we are doing good work.
 - 13) Officer elections
 - a) Dwight Aakre scheduled to move to chair, Ray Massey move to vice-chair.
 - b) Motion to accept Dale Nordquist as secretary. Passed by acclamation
 - 14) Fall 2009 meeting
 - a) October 2 noon to October 3 noon.
 - b) Kansas City
 - c) Ray will find out where the program leaders are meeting and will organize the meeting place accordingly.
 - 15) Spring 2009 meeting
 - a) May 12-14, 2009
 - b) Wisconsin – tentative location
 - 16) Adjourn

**NORTH CENTRAL FARM MANAGEMENT EXTENSION COMMITTEE
Spring 2008**

State: IOWA

1. Staffing Changes			
Type (a)	Name	Effective Date	Area of Responsibility
R	Bob Wisner	Dec. 2007	Grain Marketing

(a) Refers to new (N), retirement (R), change in assignment (C) or terminated (T).

2. Program Changes			
Subject Matter Area	Emphasis (b)	Brief Description	Contact Person
Crop production costs and margins	Increased	Costs for seed, fertilizer and pesticides will be up substantially for 2008.	Mike Duffy
2008 Farm Bill	New	Waiting to see what it is. Commodity and conservation programs will be high priority.	Duffy, Edwards,
Women in Ag	Increased	Hoping for RMA grant to establish a regional coordinating office for Annie's Project	Tim Eggers, Bob Wells, Edwards
Cash Rental Contracts	Increased	A more extensive survey of cash rental rates for farmland and buildings is being conducted. Educational materials about flexible cash leases will be expanded.	Edwards, Darnell Smith, Duffy
Land tenure in Iowa	Increased	A new survey of land tenure characteristics in Iowa will be published (carried out every 5 years)	Duffy, Smith

(b) Refers to new (N), redirected (R), increased (I), deleted (D).

Weather, Growing Conditions & Miscellaneous Notes:

Waiting for it to dry out. Winter was colder than usual. Corn and soybean acres will be back to traditional proportion.

3. Successful Activities
<p><u>Sharing Machinery and Labor.</u> Five workshops were held with 125 attendees. Working on putting materials and case studies into a manual for publication.</p> <p><u>Women in Agriculture (Annie's Project).</u> Six weekly sessions were held for about 7 groups. Approximately 1,200 have participated since 2003.</p> <p>Risk Management for Cow/calf Producers.</p>

4. Publications

NORTH CENTRAL FARM MANAGEMENT EXTENSION COMMITTEE

Spring 2007

State: Illinois

1. Staff changes

Hires

Andrea Martens (Berkeley) – international agribusiness
Grain Gunderson (with Iowa State) – food economics
Lia Nogueria (Washington State) -- agribusiness
Mindy Baker (Iowa State) -- grain marketing

Leaving

Miguel Gomes – going to Cornell
Lauren Unnevehr – going to ERS
Jerry Nelson – going to IFPRI

2. Program changes

The Department has added a new concentration in financial planning this. Graduates will be prepared to work in the financial industries and should be prepared to take the *Certified Financial Planner* exam. Large numbers of students have enrolled in this concentration such that limits will be placed on enrollment. (Currently, there are over 600 undergraduate majors in the Department.)

Weather, Growing Conditions & Miscellaneous Notes:

Its wet.

3. Successful activities

A new set of meetings were conducted this year entitled “Managing 2008 Gross Revenues and Risk”. Five meetings were held around the state. Topics included “Yield Risk: Has it Been Reduced”, “Crop Insurance Decisions in 2008”, and “Marketing Based on Crop Insurance Choice”

In December the “2007 Farm Economic Summit” was conducted. Topics included “Outlook for Crop and Livestock Prices”, “Influence of Weather and Technology on Corn and Soybean Yields”, “Crop Production Cost and Rotation Decisions”, “Farm Profitability through 2010”, “Revenue Implications of the New Farm Bill”, “Impact of Ethanol on Crop and Livestock Sectors”, and “Farm Lease Trends and Strategies”. Presentation downloads are available at: <http://www.farmdoc.uiuc.edu/IFES/2007/presentations/index.html>.

4. Publications

Weather, Growing Conditions & Miscellaneous Notes:

After a delayed spring, conditions improved and planting proceeded relatively well, although somewhat behind the 5-year average. Good conditions this past week probably allowed corn planting to be essentially completed and good progress on soybeans.

MISCELLANEOUS NOTES:

**NORTH CENTRAL FARM MANAGEMENT EXTENSION COMMITTEE
Spring 2008**

State: Kansas

1. Staffing Changes			
Type (a)	Name	Effective Date	Area of Responsibility
N	Timothy Dalton	1/15/08	International Economics, R&T
N	Jason Bergtold	1/15/08	Production Economics, R&T
C	Terry Kastens	7/01/07	Went to half time, Extension Farm mgmt
R	Sarah Fogleman	1/01/08	Resigned as SE Area Economist
Recruiting	SE Area Economist	In Process	We are Currently Searching, Deadline Approaching, Please send Qualified Applicants
C	Mike Langemeier	5/01/08	Gave up most of his KMAR Administrator Duties to return to more traditional R, T, & E , Kevin Herbel (Farm Management Association Administrator) is Temporarily filling in, we are looking for a longer term solution
N	Mark Dikeman	6/01/07	Farm Mgmt Association NE KS
N	Hannah Berns	4/15/08	Farm Mgmt Association SE KS
Recruiting (2)	Farm Mgmt Assoc	In Process	Farm Mgmt, both SC and NC KS

(a) Refers to new (N), retirement (R), change in assignment (C) or terminated (T).

2. Program Changes			
Subject Matter Area	Emphasis (b)	Brief Description	Contact Person
Farm Transition Planning	I	Conducting Transition Planning Workshops and Followup	Rod Jones
Farm Policy Updates	I	Keeping up with policy proposals	Troy Dumler
Labor Management	D	Don't have anyone doing without Sarah	

(b) Refers to new (N), redirected (R), increased (I), deleted (D).

3. Successful Activities
Transition Planning Workshops and followup by Farm Analyst was extremely successful and well received this past winter. The MAST group this winter was also a success, though fewer out of the class of 26 were able to return to campus for the second face to face session than we have had in previous classes. We are not sure what that means. All of us that work in Farm Management were extremely busy with Land Value and Land lease meetings and other related programming this Winter and spring.

Lots	See Agmanager.info for updated publications	

Weather, Growing Conditions & Miscellaneous Notes:

MISCELLANEOUS NOTES:

Things are great in most of Kansas (if you happen to be a grain farmer and not a livestock farmer). Most of Kansas had good crops in general last year, and net farm income was at record levels by far. SC Kansas had a wheat crop failure in 07, but had enough crop diversity in general to still end up with a very high net farm income on average. Obviously there is a lot of diversity across farms. (The executive summaries are available for the results from the Kansas Farm Management Association Program for 2007).

Livestock farmers are suffering across the board, with very high feed costs.

The wheat crop looks good in most of Kansas, with the exception being a dry pocket in Southwest Ks. Unlike the corn belt, many farmers in Kansas have been able to get in and start planting Corn. Adequate moisture in most locations.

A lot of concern about costs of production (obviously), and forward marketing options as many grain buyers stopped writing cash forward contracts due to the margin call situation this spring.

Rod Jones

Weather, Growing Conditions & Miscellaneous Notes:

Wet and Cold! For March – May, 2008 was the coolest since 1996; wettest since 1973. Winter (Dec-Feb) was the 6th wettest on record. Unprecedented precipitation during the Dec-mar period. Some locations have had 5 consecutive months of above normal precipitation and 3 consecutive months of below normal temperatures. None of MO is listed in any kind of drought.

From NASS April 27 report: Spring tillage is 24% complete, over a month behind last year and the 5-year average. State-wide, topsoil moisture rates 48% adequate and 52% surplus. Corn planting is 8% complete for the State, nearly 4 weeks behind last year and normal. Winter wheat condition for the State is rated 50% good to excellent.

MISCELLANEOUS NOTES:

This year Extension has been cooperating with Farm Progress Publications to present the Missouri Master Farmer Award. If your state has been involved in this, Ron Plain would appreciate talking with you about your efforts.

Missouri passed a new law , Qualified Beef Tax Credit, that pays producers \$.10/pound of gain if 200 pounds are added to the average last 3 year sale weights.

Missouri continues to have tax institutes each year. Mike Hardin, retired from Oklahoma State University, teaches. What are other states doing in the face of no active faculty dedicated to tax issues?

Weather, Growing Conditions & Miscellaneous Notes:

Wet and Cold! For March – May, 2008 was the coolest since 1996; wettest since 1973. Winter (Dec-Feb) was the 6th wettest on record. Unprecedented precipitation during the Dec-mar period. Some locations have had 5 consecutive months of above normal precipitation and 3 consecutive months of below normal temperatures. None of MO is listed in any kind of drought.

From NASS April 27 report: Spring tillage is 24% complete, over a month behind last year and the 5-year average. State-wide, topsoil moisture rates 48% adequate and 52% surplus. Corn planting is 8% complete for the State, nearly 4 weeks behind last year and normal. Winter wheat condition for the State is rated 50% good to excellent.

Weather, Growing Conditions & Miscellaneous Notes:

MISCELLANEOUS NOTES:

The winter was open in the western half of the state. The state climatologist reported data showed the 6-months (Oct-Mar) were the driest on record for the whole state. The western half of the state remains dry. Planting progressed rapidly, but there is concern about stand establishment. The southeastern corner of the state, as well as the Red River Valley, has delayed plantings due to three snowstorms in April, the last of which left as much as 18 inches on April 26. Land values, land rents and used machinery prices have all increased significantly.

Completed by Dwight Aakre

Weather, Growing Conditions & Miscellaneous Notes:

The spring has generally been cool and wet except for the Panhandle area which is still dry. As of May 5th, corn was only 31% planted compared to the average of 47% for that date. Wheat development was also significantly behind schedule. It was described as 25% jointed compared to the long run average of 60%. Over the whole state the wheat crop 34% was classified as fair or poor and 66% was good or excellent. There was a lot of winter kill in wheat in the northern Panhandle.

MISCELLANEOUS NOTES:

There is a lot of concern in the ag sector on where the ag economy is headed. One lender told me recently he had just worked the largest ag loan he had ever been involved with and the largest farm bankruptcy he had been involved with – all in the same week. Most elevators are still offering forward contracts for 2008 crops but not beyond. Some elevators are not offering '08 contracts. The farm business association, now operating as a private operation called Nebraska Farm Business Inc, reported record average net farm income of \$193,000 for 2007.

Miscellaneous Notes:

Scouts Guess Oklahoma Wheat Crop at "Normal" Levels for First Time in Four Years

~~~~~

The 2008 Oklahoma wheat crop could end up being 149 million bushels, based on scouts that have looked at wheat fields over the last four to five days. The number was the sum total after those reports had come in yesterday during the Oklahoma Grain and Feed Association's spring meeting in Oklahoma City.

Mark Hodges reports 4.7 million acres are predicted to be harvested this season across the state at an average yield per acre of 31.7 bushels- which nets the 149 million bushels of production that the scouts are anticipating. Of course, a year ago- these same scouts had hopeful ideas of a fairly good sized wheat crop as well- but the persistent rains around harvest plus leaf rust resulted in the crop only amounting to 98 million bushels in 2007.

No new publication since last meeting. New, updated publication on land values and cash rents should be released soon.

### **Weather, Growing Conditions & Miscellaneous Notes:**

Date: 4/30/08 Spring fieldwork and crop progress advanced normally for the beginning of the week, but growers in eastern South Dakota experienced a significant set-back due to inclement weather in the latter part of the week. Reporters expressed concerns that the snowfall may keep many operators out of the field for most of the upcoming week. Winter wheat breaking dormancy advanced 5 percentage points from last week, now up to 97 percent. Winter wheat conditions are now rated at 57 percent good to excellent, compared to 64 percent last week. Barley, oats, and spring wheat seedings progressed to 34 percent, 47 percent, and 50 percent seeded, respectively. Small grain seeding progress is generally ahead of last year at this time, but well behind the five-year average.

Fri, May 2: Lots of moisture west river

Much of the area west of the river received at least an inch of rainfall yesterday. Several places were over 2". The heaviest snowfall reports are from the northern BH with 2-3' reports in the Lead-Deadwood area. There is also an area in western Butte and Harding Counties where snowfall is being reported in this 2-3" range or more. This may produce some short-term flooding issues over the weekend as we warm-up and potentially receive some rainfall on top of the snow. This will be of most concern in those areas mentioned above with the heaviest snows.

Crop Progress and Crop Condition information for major crops can be found on the Extension Economics web page at <http://econ.sdstate.edu/Extension/CMA.htm>

### **MISCELLANEOUS NOTES:**

Department of Economics is now involved in a project with the South Dakota Department Of Revenue to develop land valuation productivity index for the re-valuation of agricultural land for tax purposes. The Department is also involved, to a lesser extent, in an I-29 Sci Tech Corridor initiative. Extension faculty have also been included in Emerging Issues Task Forces.

The ABS College has established three integrated task forces to help South Dakotans respond to the tremendous shift in the economic paradigm as it relates to food and fuel.

The task forces are asked to develop an educational program with support materials for distribution starting at DakotaFest and State Fair. Programs should meet the needs of CES, AES, and SDSU teaching audiences.

In reviewing the mission of each task force, the leadership team recommended the following task force membership:

- Profitability in animal agriculture during a time of high feed costs:
- Relay and cover crops to enhance crop profitability during a time of high input costs:
- Adjusting family resources in the face of high transportation and energy costs:

| <p>Continued strong interest in dairy modernization topic. Many smaller producers are seeking ways to improve labor efficiency without growing beyond midsized herds.</p> <p>Farm and Industry Short Course numbers are growing with renewed profitability on the farm. A new "Green Industry" certificate program was started in 2008. This is a cooperative venture between UW CALS and the Madison Area Technical College.</p> |

**Weather, Growing Conditions & Miscellaneous Notes:**

Very heavy winter snowfall (Madison received 100"). Cool wet spring. Growing conditions are improving rapidly. General concerns about high cost of purchased fuel, fertilizer and feed for 2008 growing season. Crop insurance coverage appears to be about in line with last season.

**MISCELLANEOUS NOTES:**
